Engineering Technology Project Specification (A05668)

Short Title:	ET Project Specification		
Faculty	Science and Computing		
Department	Engineering Technology		
Cluster	Business		
Author	CLAIRE.FITZPATRICK		
Credits	5	**Level:**	Advanced

Description of Module / Aims

In this module, the learner is provided with the opportunity to write project specifications, conduct research to develop new knowledge, apply existing knowledge, design, plan work and manage time. Present and produce report and documentation on the proposed project theme and its planned implementation.

Programmes

BEng (Hons) in Automation Engineering with Data Intelligence (`WD_EAUTO_B`)	4 / 7 / M
BEng (Hons) in Electrical Engineering (`WD_ETRIC_B`)	4 / 7 / M
BEng (Hons) in Electrical and Automation Engineering (International) (`WD_ETRIC_BI`)	4 / 7 / M
BEng (Hons) in Information Engineering (International) (`WD_EEELC_BI`)	4 / 7 / M
BEng (Hons) in Mechanical and Manufacturing Engineering (`WD_EMSEN_B`)	4 / 7 / M
BEng (Hons) (`WD_ETRIC_B`)	4 / 7 / M
BSc (Hons) in Applied Electronics (`WD_EELEC_B`)	2 / 3 / M
BSc (Hons) in Manufacturing Engineering (`WD_TCAMF_B`)	1 / 1 / M

Indicative Content

- Formulating a project proposal
- Understanding and writing specifications
- Planning actions, time management, book logging
- Conducting research for knowledge development on project theme
- Applying new acquired knowledge and existing knowledge to unfamiliar problems
- Designing appropriate solutions
- Developing communication skills (writing and presentation skills)

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Specify a project proposal taking into account factors such as project requirements, ergonomics, safety, ethics, and relevant standards.
2. Develop realistic goals,based on available resources & difficulty of tasks for the milestones required to complete a project.
3. Formulate solutions to problems by assessing alternative solutions and presenting design decisions.
4. Apply technical knowledge to unfamiliar problems having identified knowledge gaps, searched published sources of information and having due regard to plagiarism.
5. Communicate in an effective manner, by presenting the project theme/specification in an interactive Q & A setting.

Learning and Teaching Methods

- Library and web based research
- Interaction with project supervisors and lecturing staff for guidelines
- Independent work
- Interaction with peers

Assessment Methods

	Weighing	Outcomes Assessed
Continuous Assessment	100%	1,2,3,4,5
Presentation	10%	5
Project	90%	1,2,3,4

Assessment Criteria

70% - 100%: The learner has: attained the module learning outcomes at an excellent level; demonstrated a comprehensive knowledge of the associated subject matter; achieved an excellent level of the skills required for the subject matter; demonstrated the ability to carry out further investigation and problem solving associated with the subject matter.

60% - 69%: The learner has: attained the module learning outcomes at a very good level; demonstrated a detailed knowledge of the associated subject matter; achieved a very good level of the skills required for the subject matter.

50% - 59%: The learner has: attained the module learning outcomes at a good level; demonstrated a good knowledge of the associated subject matter; achieved a good level of the skills required for the subject matter.

40% - 49%: The learner has: attained the module learning outcomes at a basic level; demonstrated a basic knowledge of the associated subject matter; achieved a basic level of the skills required for the subject matter.

<40%: The learner has not: attained the module learning outcomes; demonstrated sufficient knowledge of the associated subject matter; demonstrated a sufficient level of the skills required for the subject matter.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Lab	48	
Independent Learning	87
