

MIS and E-Business

Science

May, 2026

Short Title: MIS and E-Business
Faculty Science and Computing
Department Science
Cluster Business
Author SRWALSH
Credits 5

Level: Advanced

Description of Module / Aims

This module will address the concepts and issues of the design and use of information systems. It will address the use of electronic business and information systems to support the operations and management of a modern enterprise. Students will emerge from this module with an understanding of how systems can be utilised to automate a company's internal and external information flow.

Programmes

BUSI-0005	BSc (Hons) in Agricultural Science (WD_SAGRI_B)	4 / 7 / E
BUSI-0006	BSc (Hons) in Land Management (in Agriculture) (WD_SBSAG_B)	1 / 1 / M
BUSI-0006	BSc (Hons) in Land Management (in Horticulture) (WD_SBSHO_B)	1 / 1 / E

Indicative Content

- Understand the flow of information within organisations
- Understanding of the foundation principles of management information systems
- Introduction to information systems and how they add value to businesses for competitive advantage
- Enterprise systems - Enterprise Resource Planning (ERP); Customer Relationship Management (CRM); Supply Chain Management (SCM)
- Information system development
- Information security

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Assess the importance of information quality within organisations.
2. Interpret the foundation principles of management information systems.
3. Assess how information systems can provide competitive advantage.
4. Critique the role of enterprise systems within an organisation.
5. Comment on the security, privacy and ethical issues surrounding information systems.
6. Produce well designed websites.
7. Evaluate the use of social media technologies in a business context.

Learning and Teaching Methods

- Lectures will be the main delivery mode, supplemented by participative case studies and independent reading on the issues covered in the lecture material. Overall the course will be characterised by student participation in both classroom activities and self-directed learning outside the classroom.
- Practicals will enable students to design and develop websites and demonstrate the use of social media.

Assessment Methods

	Weighing	Outcomes Assessed
Final Written Examination	60%	1, 2, 3, 4, 5
Continuous Assessment	40%	
<i>Practical</i>	40%	6,7

Assessment Criteria

- <40%:** Inability to demonstrate a basic understanding of the fundamental concepts associated with organisational systems theory.
- 40%-49%:** Able to demonstrate a basic understanding of the fundamental concepts outlined in the content above. Able to attempt to provide solutions to problems without actually finding a complete solution.
- 50%-59%:** All the above in addition to applying these ideas and approaches to real life problems to a rudimentary level.
- 60%-69%:** In addition to the above, be able to analyse and resolve problems, and able to express their findings with rigour and precision.
- 70%-100%:** All the previous to an excellent level. Demonstrated ability to put a solution into a context and assess whether such solutions are meaningful, and adapt analytic approaches where necessary.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Lecture	24	
Practical	24	
Independent Learning	87
