Research Project (Pharma L8) (A30201)

Short Title: Research Project (Pharma L8)
Faculty Science and Computing
Department Science
Cluster Placement and Projects
Author CLENNON
Credits 10

Level: Advanced

Description of Module / Aims

Projects will be carried out under the supervision of individual members of the academic staff. Projects will be linked either to research activity within the department or to a relevant industrial problem.

Programmes

PROJ-0101 BSc (Hons) in Pharmaceutical Science (WD_SPHSC_B)

4 / 8 / M

Indicative Content

- Planning and design of scientific project in the context of a literature review.
- Implementation of project work
- Preparation of written report on project.
- Interpretation and critical evaluation of results in the context of the relevant scientific literature
- Presentation of report at oral seminar/poster session

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Design and plan a program of work after a critical evaluation of literature related to a scientific problem.
2. Organise and safely implement a detailed research project.
3. Manage work independently and demonstrate initiative towards set objectives, trouble-shooting related problems.
4. Prepare and structure a comprehensive and referenced scientific report.
5. Produce an oral presentation/poster to disseminate the results of a complex scientific review.

Learning and Teaching Methods

- Project practical work.
- Preparation of scientific report, thesis.
- Oral presentation at research seminar or poster session.

Assessment Methods

	Weighing	Outcomes Assessed
Continuous Assessment	100%	
<i>Presentation</i>	20%	5
<i>Practical</i>	40%	1,2,3
<i>Lab Report</i>	40%	4

Assessment Criteria

- <40%:** Insufficient level of research work performed in terms of quality and quantity of research output. Inadequate standard and knowledge of research topic evident through poor report writing and oral presentation skills.
- 40%-49%:** Adequate level of research work performed in terms of quality and quantity of research output. Adequate standard and knowledge of research topic evident through fair report writing and oral presentation skills.
- 50%-59%:** As well as the above, the student will display a good level of research work performed, in terms of quality and quantity of research output. Good standard and knowledge of research topic evident through good report writing and oral presentation skills, supplemented by an ability to present this knowledge in a clear and concise manner.
- 60%-69%:** In addition to the above, the student will demonstrate a very high level of research work performed in terms of quality and quantity of research output. High standard and knowledge of research topic evident through very good report writing and oral presentation skills, supplemented by an ability to present this knowledge to a high technical standard.
- 70%-100%:** All previous to an excellent level. In addition, the student will demonstrate an extensive level of research work performed, in terms of quality and quantity of research output. Excellent standard and knowledge of research topic evident through superior report writing and oral presentation skills, supplemented by an ability to present this knowledge to a very high technical standard.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Practical	120	
Independent Learning	150
