Electronic Engineering Project Implementation (A05133)

Short Title:	Elec Eng Proj Implementation	
Faculty	Science and Computing	
Department	Engineering Technology	
Cluster	Electronics	
Author	CLAIRE.FITZPATRICK	
Credits	10	Level: Advanced

Description of Module / Aims

This module follows on from Project Specification described in the previous semester outline. The student has thus already identified the particular challenges to be overcome and milestones to be achieved in this semester. Because the background work has already been covered through the literature research and the early project efforts, this semester should produce significant advances in terms of attaining the final goal. The work is then faithfully represented in a thesis, which shall include an accurate and concise description of the context, the challenge, the solution and the result of the particular problem posed. All work shall be the student's unless specifically stated otherwise through citation.

Programmes

PROJ-0095 BEng (Hons) in Electronic Engineering (WD_EONIC_B)

4 / 8 / M

Indicative Content

- Projects are selected in collaboration with industry, based on research themes carried out by researchers at postgraduate level, in collaboration with other academic institutions and on occasion at the suggestion of the student themselves.
- Literature Research (Periodicals, IEEE search engines, Internet)
- Project Management (appraise the problem, break into constituent parts, identify milestones, based on time, difficulty, other resources available and overall ability to achieve the goals)
- Early Milestones
- Presentation through seminar / report on progress

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Confirm an ability to set and meet achievable milestones.
2. Transform the background and contextual knowledge of the previous semester into real progress in terms of knowledge and ability in the project area.
3. Defend a chosen course of action, based on rational reasoning, resources and abilities.
4. Present a project context, status quo and achieved outcome to peers and staff in an open forum/seminar.
5. Accurately and faithfully represent their work in a project report, acknowledging where it occurs the presence and level of input of others.
6. Maintain a professional relationship with the supervisor and maintain a log of meetings.

Learning and Teaching Methods

- One-to-one weekly scheduled meetings with supervisor
- Problem-based learning (posing of project-specific problems where student researches and devises an appropriate solution, typically over a 1- or 2-week period)

- Independent learning through a thorough reading of the project area.
- Proof-reading and feedback of the early versions of the report

Assessment Methods

	Weighing	Outcomes Assessed
Final Project	100%	1,2,3,4,5,6

Assessment Criteria

70% -

100%: The learner has: attained the module learning outcomes at an excellent level; demonstrated a comprehensive knowledge of the associated subject matter; achieved an excellent level of the skills required for the subject matter; demonstrated the ability to carry out further investigation and problem solving associated with the subject matter.

60% - 69%: The learner has: attained the module learning outcomes at a very good level; demonstrated a detailed knowledge of the associated subject matter; achieved a very good level of the skills required for the subject matter.

50% - 59%: The learner has: attained the module learning outcomes at a good level; demonstrated a good knowledge of the associated subject matter; achieved a good level of the skills required for the subject matter.

40% - 49%: The learner has: attained the module learning outcomes at a basic level; demonstrated a basic knowledge of the associated subject matter; achieved a basic level of the skills required for the subject matter.

<40%: The learner has not: attained the module learning outcomes; demonstrated sufficient knowledge of the associated subject matter; demonstrated a sufficient level of the skills required for the subject matter.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
