Food Innovation and Entrepreneurship (A07801)

Short Title: Food Innov. & Entre
Faculty Science and Computing
Department Science
Cluster Food Science
Author EDUGGAN
Credits 15

Level: Advanced

Description of Module / Aims

This module is designed to uniquely bridge the knowledge gap between science, culinary arts and business. It offers a combination of critical, reflective and technical knowledge in the development of innovation in new food product development.

Programmes

	BA (Hons) in Culinary Arts (WD_HCULA_B)	4 / 7 / E
SCIE-0063	BSc (Hons) in Food Science and Innovation (WD_SFSIN_B)	4 / 7 / M
SCIE-0063	BSc (Hons) in Food Science and Innovation (WD_SFDSC_B)	4 / 1 / M

Indicative Content

- Food Product Development Innovation: food identification and awareness in food product development; culinary ingredients and associated cooking processes; impact on food supply and models of food choice; cultural specificity; defining new product development concepts, processes and characteristics; Concept generation and ideation models; new product development trends, success and failure rates in food product development, incorporating competitor analysis and voice of the consumer
- Entrepreneurship: entrepreneurs and entrepreneurship; creativity and opportunity recognition; the ingredients of starting a business; capturing and retaining customers; ingredients of starting a business; intellectual property issues
- Consumer Behaviour: introduction to consumer behaviour, diversity of consumer behaviour, consumer research; the consumer as an individual: needs and motivation; personality, perception, learning, attitudes
- Market Research: nature of marketing research theory - role in managerial-decision making; process of marketing research and limitations thereof; research design: definition of research design; research design alternatives; marketing research proposal; Secondary Data Collection and Analysis: primary versus secondary data; introduction to primary research data collection methods - quantitative methods; qualitative methods
- Sensory Science: sensory methodologies (discrimination tests, descriptive analysis, preference or hedonic testing); design of experiment and analysis for sensory testing
- Literature Search: searching the literature - effective use of library information sources, science databases, internet; scientific referencing and scientific writing skills; preparing an effective PowerPoint presentation on a research topic

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Evaluate the concepts, theories and practices of product development processes.
2. Assess and critique food commodities, their associated characteristics and alterations during various wet and dry cooking processes.
3. Interpret the fundamentals of food trends, food choices, food supply chains and cultural diversity within a gastronomic context.
4. Formulate a new food product concept through evaluation and application of various food ideation models.
5. Critique new product development success factors and reasons for failure within an innovative market orientated environment.
6. Evaluate consumer behaviour and its applications in marketing.
7. Appraise markets and competitors and explain the steps in the marketing research process.
8. Determine the role and importance of information in the management decision process.
9. Develop an entrepreneurial marketing strategy.
10. Compile, report and present a review of information on a chosen research topic.

Learning and Teaching Methods

- Lectures will provide the theory for varied aspects of the module.
- Practical classes in the kitchens will enable students to learn culinary skills.

Assessment Methods

	Weighing	Outcomes Assessed
Continuous Assessment	100%	
Assignment	30%	9
In-Class Assessment	30%	1,2,3,4,5
In-Class Assessment	10%	6,7,8
Project	30%	10

Assessment Criteria

<40%: Little or no demonstration of an understanding of the fundamentals of the learning outcomes.

40%-49%: Demonstrate limited understanding of the fundamentals of the learning outcomes.

50%-59%: Demonstrate satisfactory understanding of the fundamentals of the learning outcomes.

60%-69%: Demonstrate sound knowledge of the all topics contained in the learning outcomes and display good competence with regards to use of associated laboratory instrumentation.

70%-100%: Demonstrate comprehensive knowledge and understanding of all learning outcomes. Will display advanced competence and independence with regards to use of associated laboratory techniques and instrumentation and excellent laboratory practice.

Note:

- In addition to the normal regulations, a minimum of 35% must be achieved in both the theory and practical components of the module. In cases where continuous assessment has a practical component attendance of at least 75% in the practicals is mandatory.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Lecture	108	
Tutorial	12	
Practical	36	
Independent Learning	249
