Sheep Production (A08761)

Short Title: Sheep Production
Faculty Science and Computing
Department Science
Cluster Agriculture
Author JDAY
Credits 5

Level: Introductory

Description of Module / Aims

This module will enable the student to acquire a detailed knowledge of production and management practices, and the everyday skills needed to manage a sheep flock. It will also enable the student to evaluate the economic returns from a sheep enterprise.

Programmes

AGRI -0009 BSc in Agriculture (WD_SAGUL_D)

2 / 3 / E

Indicative Content

- Feeds and feeding
- Breeding
- Systems of lamb production
- Diseases
- Sheep facilities
- Sheep production tasks
- Economics of sheep production

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Identify feeds and feeding systems for sheep.
2. Compare systems of sheep production.
3. Employ disease control strategies.
4. Examine sheep facilities.
5. Complete safely tasks associated with sheep production with due regard to good environmental practice and the animal's health and welfare.
6. Calculate the cost of sheep production.
7. Describe good environmental practices in sheep production.
8. Describe appropriate actions to promote and maintain the good health and welfare of sheep.

Learning and Teaching Methods

- Lectures .
- Practical instruction.
- DVDs.
- Online resources: Sheep Ireland, Teagasc, Bord Bia.
- Field trips.

Assessment Methods

	Weighing	Outcomes Assessed
Final Written Examination	50%	1,2,3,4,6,7,8
Continuous Assessment	50%	
<i>Practical</i>	25%	5
<i>Assignment</i>	25%	2,8

Assessment Criteria

<40%: Very limited knowledge and understanding of the subject matter.

40%-49%: Demonstrate a limited knowledge of the subject matter. May have some problems with critical thinking and problem-solving.

50%-59%: Demonstrate satisfactory general knowledge of the main issues within the subject. Good practical skills.

60%-69%: In addition, the student will demonstrate more detailed knowledge of all topics and demonstrate an ability to evaluate detailed knowledge acquired in the module to new material.

70%-100%: The learner will be able to demonstrate comprehensive knowledge and understanding of all learning outcomes, and an ability to evaluate and relate topics that overlap all of the learning outcomes.

Note:

- In addition to the normal regulations, a minimum of 35% must be achieved in both the final exam and continuous assessment components of the module. In cases where continuous assessment has a practical component attendance of at least 75% in the practicals is mandatory.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Lecture	36	
Practical	12	
Independent Learning	87
