Accounting for Food Science (A15261)

Short Title:	Accounting for Food Science	
Faculty	Science and Computing	
Department	Science	
Cluster	Business	
Author	KGRENNAN	
Credits	5	Level: Introductory

Description of Module / Aims

The aim of this module is to understand, prepare and interpret internal management accounting information and recommend business decisions based on their interpretation with specific reference to the food sector. Students will also learn the criteria used to make operational decisions.

Programmes

ACCS-0006 BSc in Food Science with Business (WD_SFDSC_D)

2 / 3 / M

Indicative Content

- General principles of management accounting
- Cost-volume-profit and break-even analysis
- Decision making (short-term)
- Pricing
- Budgeting and variance interpretation
- Management accounting issues and developments as applied to the food sector

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Explain the basic cost terms, concepts and elements used to determine product and service costs.
2. Distinguish between fixed and variable and calculate break-even points.
3. Use costing information to recommend short-term courses of action and have an appreciation of non-financial factors used in decision making.
4. Recognise and prepare aspects of the business budget process and be capable of interpreting major budget variances.
5. Identify pricing techniques and the various options for pricing.
6. Review current trends and issues in management accounting as applied to the food industry.

Learning and Teaching Methods

- Formal lectures.
- Class discussion.
- Practical skills exercises and assignments.
- Assigned self-learning.

Assessment Methods

	Weighing	Outcomes Assessed
Final Written Examination	70%	1,2,3,4
Continuous Assessment <i>Assignment</i>	30%	5,6

Assessment Criteria

<40%: Very little knowledge and understanding of the subject matter. Unable to carry out critical thinking or practical skills

40%-49%: Demonstrates a limited knowledge of the subject matter. May have some problems with critical thinking and problem solving. Adequate practical accounting skills.

50%-59%: Demonstrates satisfactory general knowledge of the main issues within the subject. Good practical accounting skills.

60%-69%: Demonstrates skilled and sound knowledge of the subject matter. Shows ability to analyse and logically organise accounts in an effective way. Good critical thinking and a high level of competence and efficiency in theoretical and practical areas of this subject.

70%-100%: All of the above to an excellent level. Demonstrates authoritative handling of complex material and a highly developed and extensive understanding of the subject.
