Pharmaceutical Project Management (A33521)

Short Title: Pharmaceutical P M
Faculty Science and Computing
Department Science
Cluster Placement and Projects
Author UMCCARTHY
Credits 10

Level: Advanced

Description of Module / Aims

This module aims to provide the learner with the ability to develop an understanding of project management and its application. It aims to demonstrate the importance of the planning process in ensuring project success, to provide the student with the ability to define and build project plans, to estimate project durations using appropriate software tools, and to apply appropriate tools and techniques to control and monitor project schedules.

Programmes

PHAR-0021 BSc (Hons) in Good Manufacturing Practice and Technology (WD_SGMPT_B) 4 / 1 / M

Indicative Content

- Introduction to project management
- Project life cycle
- Project design and planning: work breakdown structure, critical path network, project risk management, project change management, project quality control
- Project execution: reporting, documentations required and communication etc.
- Project cost measurement and management: the concept of earned value
- Managing a project team: leadership, resource allocation, HR implications, the role of the project manager
- Using project management tools and techniques

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Evaluate the application of the principles of project management.
2. Design, build and troubleshoot project management plans.
3. Estimate project durations and Create, control, monitor project schedule using appropriate software tools (Software and non software).
4. Estimate project costs, report on earned value, analyse cost variances and produce estimates at completion.
5. Evaluate the project group aspects of project management - organisation, roles, attributes of the project manager, the role of sponsor etc.

Learning and Teaching Methods

- Class lectures
- Online lectures
- Case studies
- Class discussions and presentations
- Assigned self-learning

Assessment Methods

	Weighing	Outcomes Assessed
Continuous Assessment	100%	1,2,3,4,5
<i>Case Studies</i>	50%	1,2,3,4
<i>Project</i>	50%	1,2,3,5

Assessment Criteria

<40%: Very limited knowledge and understanding of the subject matter.

40%-49%: Will be able to show a good knowledge of the key learning outcomes including how to develop their competencies as a professional.

50%-59%: As well as the above the student will be able to demonstrate a good understanding of the key learning outcomes as well as be able to exercise judgement

60%-69%: In addition, the student will demonstrate more detailed knowledge of all the topics and be able to employ reflective thought as well as decision making and problem solving

70%-100%: The learner will be able to demonstrate comprehensive knowledge and understanding of all learning outcomes and be able to recognise the inter-relationship between their role as a business professional and the effective operation of the organisation.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Lecture		24
Lab		12
Independent Learning		234

Essential Material

- xx, xx. _A Guide to the Project Management Body of Knowledge (PMBOK®)_. 7th. xx: xx, 2021.
