Short Title:	Nutrition	
Faculty	Science and Computing	
Department	Science	
Cluster	Food Science	
Author	EKENT	
Credits	5	Level: Introductory

Description of Module / Aims

This module introduces the study of nutrition and the foundations of healthy eating. It will cover nutrients in food, and their role in health and the application of nutritional knowledge.

Programmes

SCIE-0031 BSc in Food Science with Business (WD_SFDSC_D)

2 / 3 / M

Indicative Content

- Study of nutrition and food habits
- Assessing nutritional status
- Basics of a healthy diet
- Dietary analysis, assessing dietary intake
- The nutrients in food and their role in health: proteins, fats, carbohydrates, vitamins, minerals
- The application of nutritional knowledge, pregnancy and lactation, infants, children and adolescents, adults and the elderly population

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Define nutrition and discuss the basics of a healthy diet.
2. Identify ways of assessing nutritional status.
3. Discuss the influences on eating habits.
4. Discuss nutrients in various food groups.
5. Explain the role of nutrients in health.
6. Review diets using dietary analysis programmes.
7. Discuss the application of nutritional knowledge across the life span.

Learning and Teaching Methods

- Lectures.
- Case studies.
- Group discussions and presentations.
- Use of Dietary Analysis computer programme.

Assessment Methods

	Weighing	Outcomes Assessed
Final Written Examination	70%	1,2,3,4,5,7
Continuous Assessment	30%	
<i>Assignment</i>	30%	1,6

Assessment Criteria

- <40%:** Very limited knowledge and understanding of the subject matter. Lacking in technical ability/skill and understanding to carry out practical/professional tasks. Failure to meet the objectives of projects. Unable to carry out or submit independent study and research.
- 40%-49%:** Demonstrate a limited knowledge of the subject matter. Show some technical ability/skill in carrying out and reporting on practical/professional tasks.
- 50%-59%:** Demonstrate satisfactory general knowledge of the main issues within the subject. Logically and competently carry out practical/professional tasks. Satisfactory handling and awareness in carrying out independent study and research. Reporting and projects adequately structured and referenced.
- 60%-69%:** Demonstrate sound knowledge of the subject matter. Show ability to analyse and logically argue in an effective and mature style. Demonstrate initiative and the ability to criticise methods used and appreciation of experimental design when carrying out practical/professional tasks. Projects and reporting coherent and soundly structured illustrating wide and in depth reading on subject coupled with the proper use of references.
- 70%-100%:** Demonstrate authoritative handling of complex material and a highly developed and extensive understanding of the subject. Provide well focused analysis and convincing argument on the subject.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Lecture	24	
Practical	12	
Independent Learning	99
