

Agriculture Project

Science

May, 2026

Short Title:	Agriculture Project	
Faculty	Science and Computing	
Department	Science	
Cluster	Placement and Projects	
Author	TWOODCOCK	
Credits	5	Level: Intermediate

Description of Module / Aims

The module is designed to equip students with the skills necessary to organise and implement a project related to the course. Students will work in groups, and in doing so develop teamwork skills. They will learn how to apply previously gained skills to implement a project, to draw conclusions and make recommendations based on analysis of results. Classes will be provided to develop the data analysis and project formatting skills of the students. Each group will present their project work in a final detailed report, while each individual student will present a poster outlining the main findings of the project.

Programmes

PROJ-0015 BSc in Agriculture (WD_SAGUL_D)

3 / 6 / M

Indicative Content

- Title of the project and project structure
- Literature review will be produced based on the project topic
- Methods used should be clearly laid out
- Results will be developed, either using data generated by the student group, or by extrapolating and developing a separate dataset
- Discussion of research findings should draw comparisons between student project and relevant peer reviewed journal publications
- Conclusions should be drawn, giving an indication of the relevance of the project findings in an agricultural context
- Recommendations on what direction future research should take or how the findings could be adapted

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Organise and implement a project related to the course. Students to be actively involved in the development of the project structure and project plan.
2. Apply skills relating to data analysis, information mining and thesis formatting to implement a project.
3. Utilise skills acquired in LO2 in the production of project report.
4. Analyse data and interpret results.
5. Establish conclusions and make recommendations based on analysis of results.
6. Assemble the project findings.
7. Justify project conclusions

Learning and Teaching Methods

- Training in database access skills in the library.

- Tutorial and assignments relating to data analysis and formatting.
- Training in communication skills including presentation skills.

Assessment Methods

	Weighing	Outcomes Assessed
Final Project	35%	1,3,4
Continuous Assessment	65%	
<i>Presentation</i>	35%	5,6,7
<i>In-Class Assessment</i>	15%	2
<i>Supervisor's Report</i>	10%	5,6,7
<i>Participation</i>	5%	5,6,7

Assessment Criteria

- <40%:** Very little knowledge and understanding of the subject matter. Unable to carry out critical thinking or practical skills.
- 40%-49%:** Will be able to show a basic knowledge of the key learning outcomes including how to organise and implement a project and present the final project report.
- 50%-59%:** As well as the above the student will be able to draw conclusions and make recommendations, compose a detailed report of the project and give a good presentation of the final project report.
- 60%-69%:** In addition, the student will be able to make detailed recommendations based on analysis of results, compose a very good report of the project and give a very good presentation of the final project report.
- 70%-100%:** The learner will be able to make detailed recommendations based on analysis of results, compose an excellent report of the project and give an excellent presentation of the final project report.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Lecture	24	
Tutorial	12	
Practical	12	
Independent Learning	87
