Computing and Mathematics

May, 2026

Work Placement (10 credits) (A13948)

Short Title:	Work Placement (10 credits)	
Faculty	Science and Computing	
Department	Computing and Mathematics	
Cluster	Professional Skills	
Author	RBIRNEY	
Credits	10	Level: Intermediate

Description of Module / Aims

The purpose of the work placement is to require the student to apply the knowledge, skills and competencies gained through the academic phase of the course through putting them into practice in a relevant workplace environment. This will allow the students to consolidate, deepen and contextualise their learning and thereby enhance their employability.

Programmes

PLAC-0138	Diploma in Computing with Security and Forensics (WD_BCSEC_SP)	3 / 3 / M
-----------	--	-----------

Indicative Content

- Work Placement: The student is required to actively engage in and successfully complete a three-month placement in a work setting approved by WIT
- Learning Agreement: At the outset of the Placement the Student will complete a Learning Agreement
- Applied Learning Portfolio: During the course of the placement students are required to maintain an Applied Learning Portfolio
- Alternative Industry-led Project: Where a student cannot secure an appropriate Work Placement they are required to complete an Industry-Led Project

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Apply knowledge, skills and competencies acquired to the analysis and creation of solutions to workplace/industry-led project problems.
2. Relate theory to practice and contextualise the theoretical knowledge gained in the programme to a relevant area of professional practice.
3. Communicate effectively in an appropriate and professional manner and format and have developed appropriate communication and interpersonal skills.
4. Analyse the learning experience resulting from the work placement/industry-led project.
5. Determine and communicate personal skills and competencies along with strengths and areas for further growth and development.

Learning and Teaching Methods

- Students will undergo an induction briefing prior to the beginning of the placement and have access to an academic supervisor during the placement period.
- The applied learning portfolio is designed to foster self-reflection on the learning gained through participation in the work placement.

Assessment Methods

	Weighing	Outcomes Assessed
Continuous Assessment	100%	
Portfolio	100%	1,2,3,4,5

Assessment Criteria

- <40%:** Unable to interpret and describe key learning events that occurred during the work placement.
- 40%-49%:** Be able to interpret and describe key learning events that occurred during the work placement.
- 50%-59%:** Ability to discuss key learning events that occurred during the work placement and ability to discover and integrate related knowledge in other knowledge domains.
- 60%-69%:** Be able to creatively solve problems that occurred during the work placement by experimenting with the appropriate skills and tools.
- 70%-100%:** All the above to an excellent level. Be able to analyse and design solutions to a high standard for a range of both complex and unforeseen problems through the use and modification of appropriate skills and tools.
