Introduction to Media Development (A13883)

Short Title: Intro. to Media Development
Faculty Science and Computing
Department Computing and Mathematics
Cluster Media Production
Author ROCONNOR
Credits 5

Level: Introductory

Description of Module / Aims

This module introduces students to the concepts, tools and technologies surrounding media development. Students will gain high-level experience with many of the concepts used in media development including user experience, storytelling, digital media (social, image, audio & video) and digital media programming.

Programmes

COMP -0626	BSc (Hons) in Applied Computing (WD_KACCM_B)	1 / 2 / E
COMP -0626	BSc (Hons) in Applied Computing (WD_KCOMP_B)	1 / 2 / E

Indicative Content

- User Experience fundamentals
- Media delivery platforms, media formats & media tools
- User-centric programming
- Lo-fidelity prototyping
- Digital image manipulation
- Timeline based editing for audiovisual media
- Social media: Conversation prism

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Recall the theoretical and practical principles of user experience.
2. Discuss at least one national or international user interface design standard.
3. Employ pre-recorded audio/visual media to a prescribed set of requirements.
4. Publish an asset online.

Learning and Teaching Methods

- This module take a practical-driven approach. Concepts are introduced in short talks and then worked on in practice through a lab/studio exercises.
- Sample assessment: Create and post a video to social media platforms to promote a product, place, person or thing.
- Studio Classes will be delivered in two 2-hour blocks.
- Apple Mac Computer Lab with relevant hardware & software (kept up to date at least annually e.g. Adobe CC, iMovie, GarageBand).
- Access to handheld cameras.

Assessment Methods

	Weighing	Outcomes Assessed
Continuous Assessment	100%	
<i>In-Class Assessment</i>	30%	1,2
<i>Assignment</i>	70%	3,4

Assessment Criteria

<40%: Unable to interpret and describe key concepts of the digital media domain(s).

40%-49%: Be able to interpret and describe key concepts of the digital media domain(s).

50%-59%: Ability to discuss key concepts of the digital media domain and ability to discover and integrate related knowledge in other knowledge domains.

60%-69%: Be able to solve problems within the digital media domain(s) by experimenting with the appropriate skills and tools.

70%-100%: All the above to an excellent level. Be able to analyse and design solutions to a high standard for a range of both complex and unforeseen problems through the use and modification of appropriate skills and tools.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Practical	48	
Independent Learning	87
