Research Project (Pharma L7) (A37082)

Short Title: Research Project (Pharma L7)
Faculty Science and Computing
Department Science
Cluster Placement and Projects
Author
Credits 5

Level: Intermediate

Description of Module / Aims

This module consists of a research and development project, which will give students the facility to plan and carry out a programme of work based significantly on their own initiative.

Programmes

RESA-0220 BSc in Pharmaceutical Science (WD_SPHSC_D)

3 / 6 / M

Indicative Content

- Projects will be based on areas such as developing and validating analytical procedures, environmental analysis, synthesis and separation of chemical compounds along with spectroscopic analysis, use of surfactants and catalysis

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Plan, organise and carry out a basic research and development project.
2. Apply previously gained theoretical and practical skills in a self-directed manner.
3. Produce a detailed report and summary of the project.
4. Use visual aids to support an oral presentation of project.
5. Apply training on green and sustainable practices in a laboratory-based project.

Learning and Teaching Methods

- Project work.
- Training in green and sustainable laboratory practices.

Assessment Methods

	Weighing	Outcomes Assessed
Final Project	100%	
<i>Practical</i>	40%	1,2
<i>Presentation</i>	15%	4
<i>Lab Report</i>	45%	3,5

Assessment Criteria

<40%: Inadequate achievement of the learning outcomes.

40%-49%: Will be able to show a basic level of achievement in relation to the key learning outcomes.

50%-59%: As well as the above the student will be able to demonstrate an understanding of some of the complexities of the topics and evaluate some results.

60%-69%: In addition, the student will demonstrate more detailed achievements of project goals including and demonstrate an ability to evaluate knowledge acquired.

70%-100%: The learner will be able to demonstrate comprehensive knowledge and understanding of all learning outcomes, predict general trends in behaviour including exceptional behaviour, and critically evaluate and relate topics.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Tutorial	10	
Practical	50	
Independent Learning	75	

Supplementary Material

- "My Green Lab Ambassador Programme." <https://www.mygreenlab.org/ambassador-program.html>

Requested Resources

- Room Type: Chemistry Lab
- IT Lab:Computer
