

Regulatory affairs

Science

May, 2026

Short Title:	Regulatory affairs	
Faculty	Science and Computing	
Department	Science	
Cluster	Quality, Regulatory and Compliance	
Author	ADONEGAN	
Credits	10	Level: Advanced

Description of Module / Aims

This module will develop the students competency in identifying, interpreting and applying the regulations and procedures involved in obtaining and maintaining marketing authorisations in European and worldwide markets, and procedures to ensure compliance to pharmaceutical legislation.

Programmes

PHAR-0022 BSc (Hons) in Good Manufacturing Practice and Technology (WD_SGMPT_B) 4 / 1 / M

Indicative Content

- Introduction to regulatory agencies, national EU and export markets
- Overview of the development of the regulations including directives, regulations and guidelines including 2001/83/EC
- Role of the regulatory affairs professional in compliance and inspections in the pharmaceutical industry
- Application procedures for Marketing authorisation including National centralised Decentralised and mutual recognition procedures
- Legal basis for applications, technical requirements and the common technical document
- Maintenance of marketing authorisations, renewals variations
- Introduction to pharmacovigilance

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Determine the agencies operating within the global pharmaceutical sector and their role in the regulation of all aspects of the regulation for the pharmaceutical industry.
2. Appraise the importance of the role of the regulatory affairs professional and their link to operations functions within the industry from development phase, to ensure compliance at all stages.
3. Compare and contrast the possible application routes to be followed to obtain a marketing authorisation in various markets, and apply a suitable strategy to meet the company's objectives and ensure a successful outcome.
4. Evaluate the relevant information necessary to be submitted to obtain and maintain marketing authorisations in major markets and compilation of the required documentation for submission of initial and ongoing submissions.
5. Monitor the post-marketing obligations of the pharmaceutical manufacturer and MA holder in the on-going safety monitoring of pharmaceutical products to ensure compliance with the regulations.

Learning and Teaching Methods

- Lectures
- Case studies

Assessment Methods

	Weighing	Outcomes Assessed
Continuous Assessment	100%	1,2,3,4,5
Case Studies	40%	3
In-Class Assessment	50%	4.5
In-Class Assessment	10%	1,2

Assessment Criteria

<40%: No understanding of the basic concept of regulatory affairs and compliance. Unable to carry out critical thinking of subject area.
