Computing and Mathematics

May, 2026

Emerging Media Technologies (A13892)

Short Title: Emerging Media Technologies
Faculty Science and Computing
Department Computing and Mathematics
Cluster Media Production
Author ROCONNOR
Credits 5

Level: Advanced

Description of Module / Aims

The module explores new trends, tools and technologies in the broad digital media domain. Students will build on their existing skills and knowledge from previous modules in the Media Development stream to track emergent technology. This module can cover any aspect(s) of media development. For example, sound, stereoscopic display, haptic feedback, physical simulation, projection mapping, lighting.

Programmes

TECH-0049 BSc (Hons) in Applied Computing (WD_KCOMP_B)

4 / 8 / E

Indicative Content

- Interaction styles and interaction techniques
- Representing information to users
- Approaches to design, implementation and evaluation of non-mouse interaction

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Generalise the interaction possibilities beyond mouse-and-pointer interfaces. (Understanding).
2. Critique emerging media trends based upon a set of discovered criteria (Evaluating).
3. Construct a system that demonstrates user action synchronization and data consistency using emerging media tools/technologies (Applying).

Learning and Teaching Methods

- This module will be characterised by student participation in both formal theoretical and practical/ studio classroom activities in which students learn theoretical concepts and apply them immediately using dedicated hardware and software.
- Studio Classes will be delivered in two 2-hour blocks.
- Sample Assignment: Critically assess the use of positional audio within a specific video game context and how it affects the immersive experience.
- Sample Project: Use previously unseen middleware tools to create and program positional audio within a video game context.
- Use of accessible, professional sound proofed recording studios with professional microphones and audio workstations (Vibe FM studios).
- Access to cameras
- Access to Video/Photography Studio

Assessment Methods

	Weighing	Outcomes Assessed
Continuous Assessment	100%	
<i>Assignment</i>	40%	1,2
<i>Project</i>	60%	3

Assessment Criteria

<40%: Unable to interpret and describe key concepts of the emerging media technology domain(s).

40%-49%: Be able to interpret and describe key concepts of the emerging media technology domain(s).

50%-59%: Ability to discuss key concepts of emerging media technologies and ability to discover and integrate related knowledge in other knowledge domains.

60%-69%: Be able to solve problems within emerging media technologies by experimenting with the appropriate skills and tools.

70%-100%: All the above to an excellent level. Be able to analyse and design solutions to a high standard for a range of both complex and unforeseen problems through the use and modification of appropriate skills and tools.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Practical	48	
Independent Learning	87
